Specialty Classes Within The Risk Landscape

Proposed Solution For The Specialty Classes

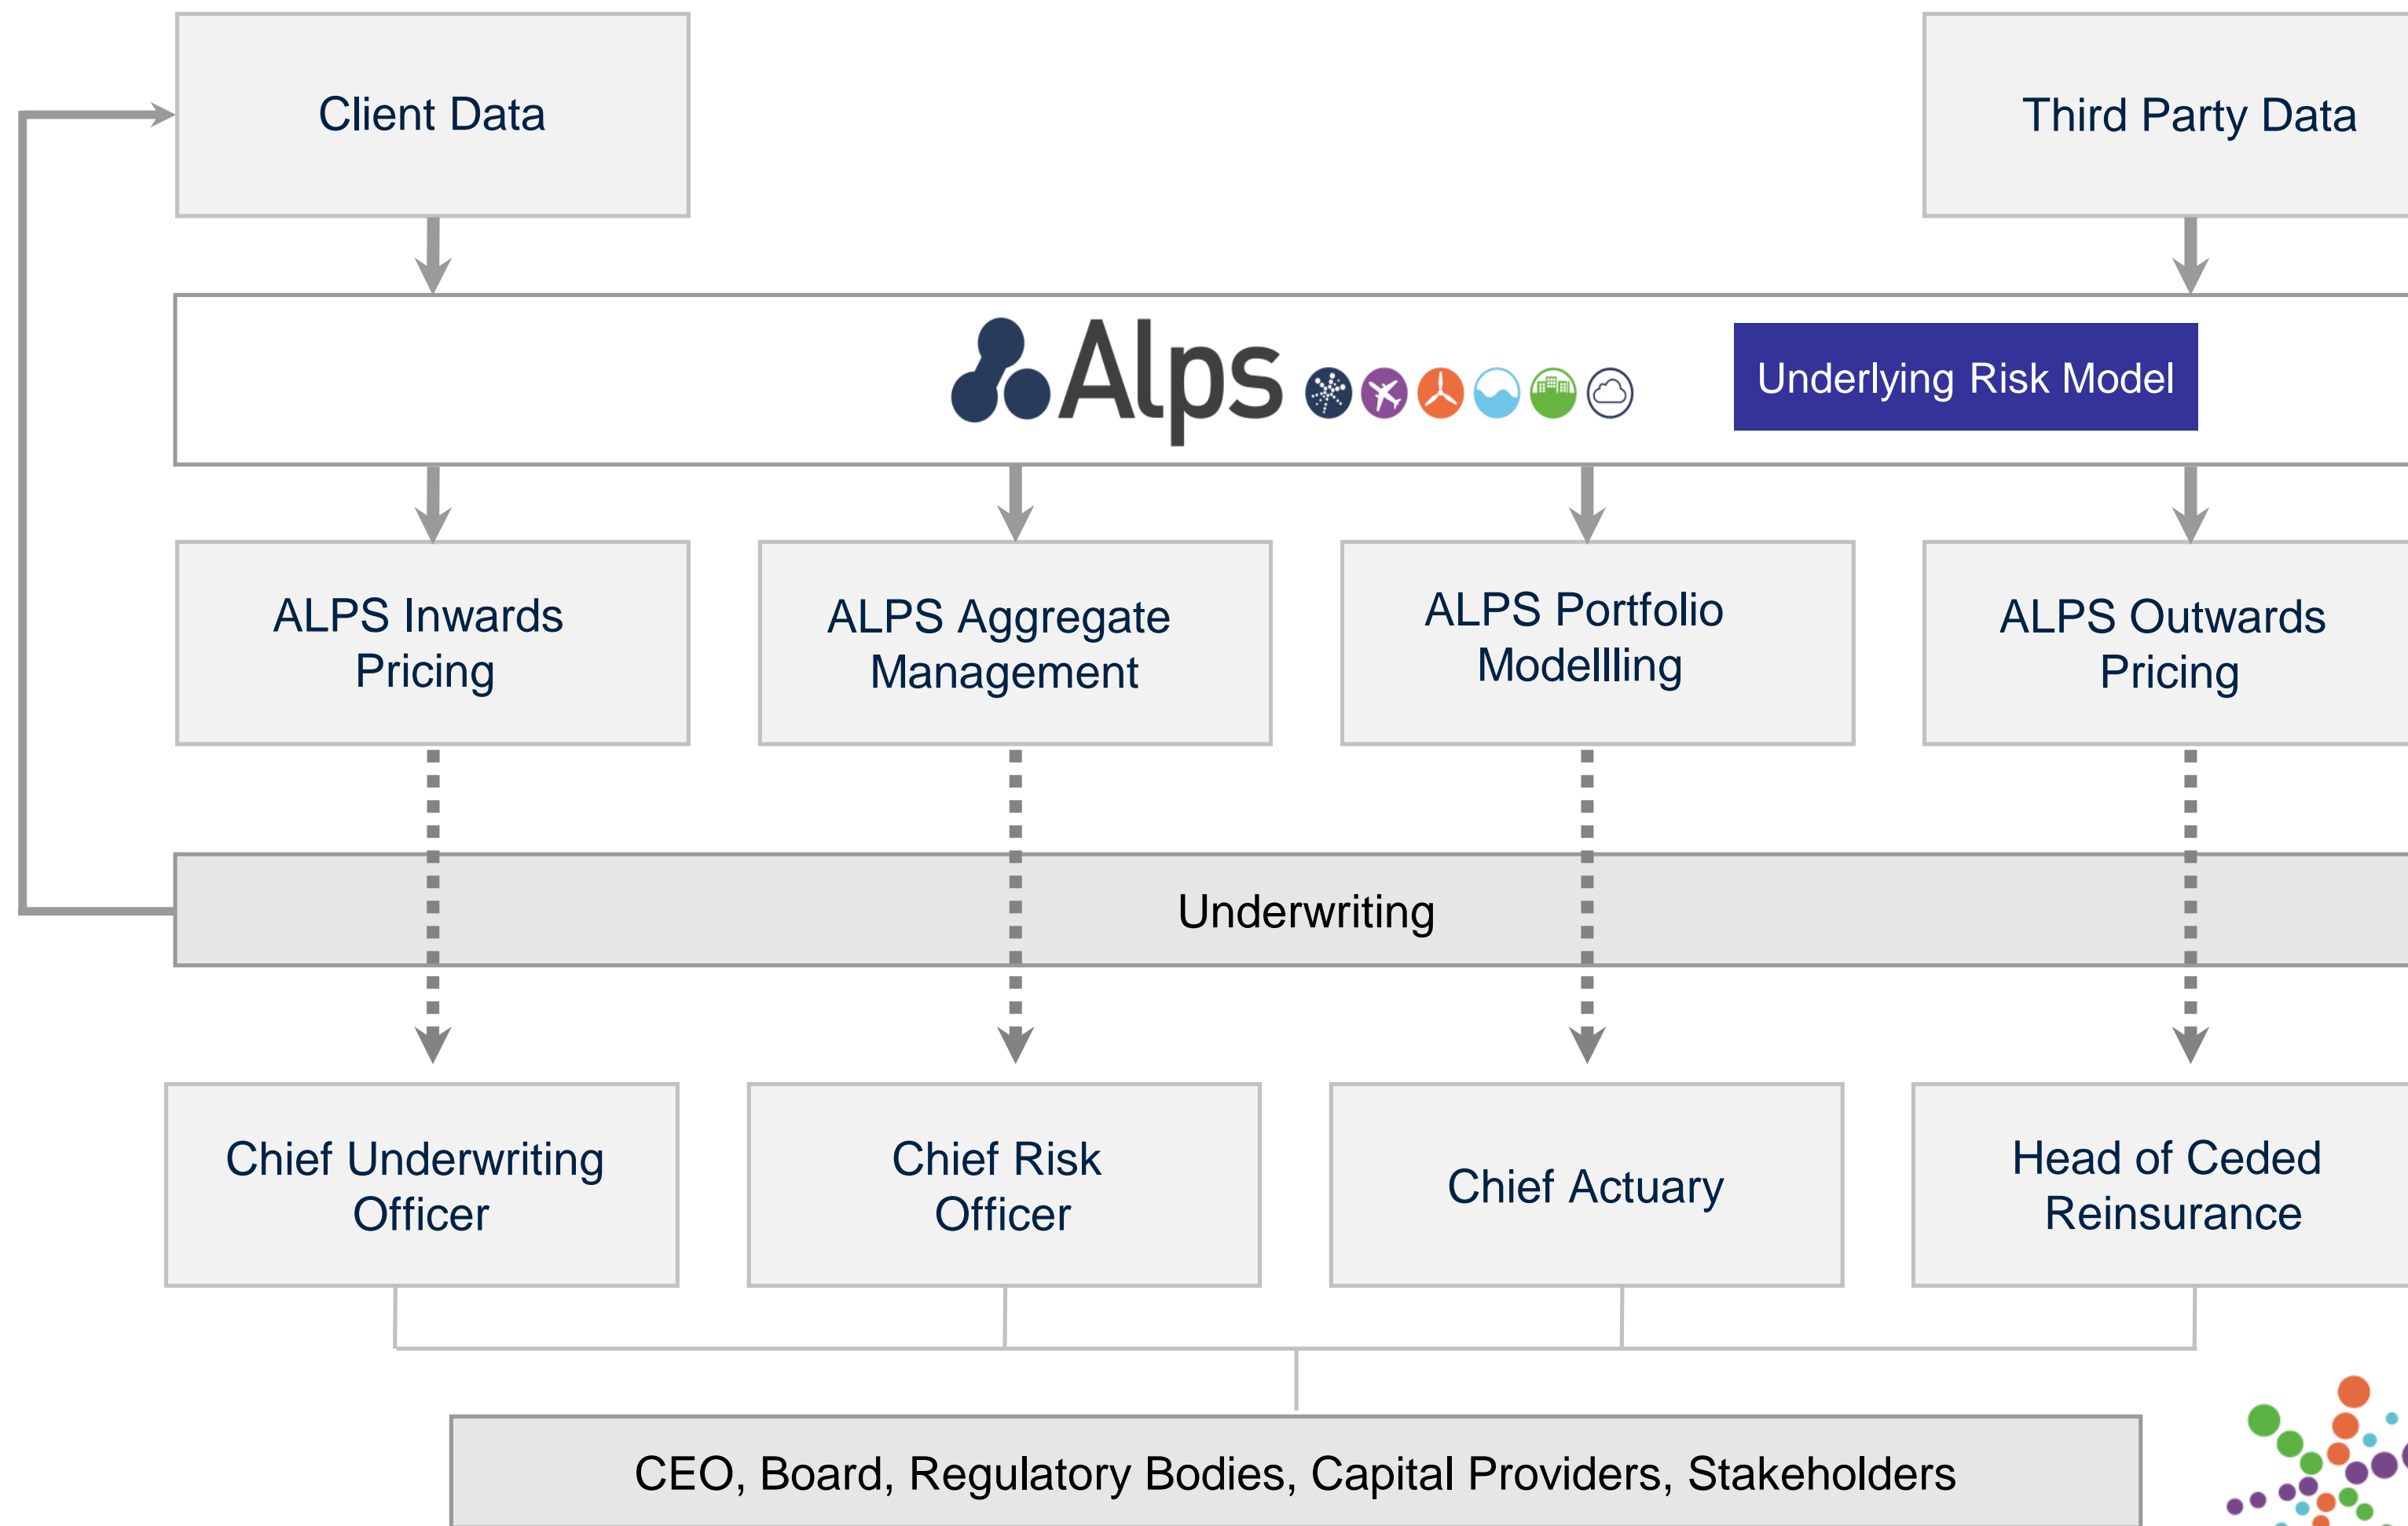

Needs of the Specialty (Re-)insurer

- Assured name matching and consolidation
- Policy exposure to be provided by Cedants on a regular basis
- Policy exposure information to be conveyed in a consistent format such as a questionnaire
- Consolidate Cedant exposures and underwriting portfolio in a single database
- Process loss / exposure scenarios against a database to determine gross and net exposure
- Leverage Cedant exposure data for pricing
- Model the entire portfolio for business planning

ALPS In The Organisation

Our Clients

Benefits

- Better understanding of exposure and capital utilisation.
- Better understanding of underlying risk prior to capital commitment.
- Optimising utilisation of capital and improved return on equity.
- Timely and consistent information on exposure.
- Valid logic integrated within the underwriting process reduces operational risk.
- Improved quality and efficiency of risk management across specialty classes.

Why Russell

- Flair in delivery
- Flexibility of risk architecture
- Fluency in risk management

Thank you
